- Pro A/V Tips
- Our District Web Site

Pro A/V Tips

To prolong the life of your projector and its bulbs during periods of extended use:

Instead of turning the projector off for a short period then back on, or leaving it on while not in use; please use the [A/V Mute](#) button. Pictures for button location on typical remote controls

Our District Web Site

All 700 pages and 70 templates of our District Web Pages will be updated for mobile devices. This includes the top & left NAV bars.

There will be 15 days that our site will be virtualized and no updates will be possible until the changes have been completed.

Over the holiday vacation is the target date for this project. Updates will be sent to web editors as dates are confirmed.

What's New

And the pick for the Interactive Panels:
Lite Touch by Lite the Nite Technologies

Next Scheduled Meetings:

SIS Committee	1/11/2017 9:30 @ Telecom
SchoolBrains Training	1/11/2017 1:00 @ Telecom
Technology Team	1/18/2017 1:00 @ Telecom
